

OneWorld
Sustainable Investments

Curriculum Vitae
James Eustace

EDUCATION

BSc (Honours): Economics (2006)

University of Surrey, UK

KEY AREAS OF EXPERTISE

- Macroeconomic analysis
- Energy project evaluation
- Risk assessment

KEY PROJECTS

- “Assessing the impact of the EU Emissions Trading Scheme upon the UK offshore oil and gas industry” – a quantitative analysis on the economics of offshore installations when subjected to various carbon price scenarios in phase III of the EU ETS.

- “Oil and Gas UK Activity Survey” 2007/8/9 – A wide ranging annual publication identifying and forecasting trends in investment, cost, revenues, and employment throughout the UK oil and gas industry.

PROFESSIONAL EXPERIENCE

- 2009: Economist, OneWorld Sustainable Investments (Cape Town)
- 2007-2009: Economist, Oil & Gas UK (London, UK)
 - As a key member of the economics team, was responsible for providing robust economic analysis to provide a collective picture of the industry.
 - Created models to simulate the impacts of changes in taxation, oil and gas prices, carbon prices, production, investment, and cost.
 - Interacted with industry leaders and politicians to ensure analysis was understood and used correctly.
- 2006-2007: Financial Services Analyst, Christies (London, UK)
 - Responsible for structuring financial products to secure business through auction of top-tier post-war and contemporary artwork.
 - Matched client expectations and needs with company risk to create viable business opportunities.
 - Managed deals from conception to completion including risk analysis, contract negotiation, foreign exchange hedging, and logistics.
 - Managed and reported risk and return figures for each deal.
- 2004-2005: Economic Research Assistant, Lehman Brothers (London, UK)
 - Responsible for providing up-to-date reactionary analysis of key market indicators to trading floor.
 - Developed models to forecast impacts of macroeconomic indicators upon financial markets and national GDP and inflation measures.
